It is my understanding that there is a possibility that the "FNSAC Committee" may come under the general cognizance of the Director's Scientific Advisory Board, i.e., Committee. Should this be the case, I wish to remind you that the Director of Security has, as a matter of policy, determined that the members of the Kinzel Committee will not receive a technical interview. This being the case, there is a possibility he will also so rule for members of the FNSAC Committee.
